

NBA 27(a)-DOCUMENTATION

Bugs and unimplemented functionalities :

SCREEN - 1 & 2 :

- The sorting of graphs has been implemented. Although the data source for two graphs (PO attainment value graph and CO attainment graph) get sorted when the radio buttons are changed, only the **graph does not get updated** on the screen.
- **Tooltips** of graphs are not customized according to the given statement

SCREEN - 3 :

- Mat-divider is used for the vertical line separating the tables but the line is not visible

SCREEN - 4 :

- The **' + additional terms' display** in the left navigation pane's select box has not been implemented and the course values are hard coded
- Npm package of **am4Charts** is used for the concentric donut chart and values are hardcoded
- The data for the tables on the right side are hard coded.
