NBA 25-DOCUMENTATION

Screen 1:

1. Academic year and term select form

- Two dropdowns for Academic Year selection and Terms (multiselect) in the case when user is either faculty or HOD and three dropdowns (additional dropdown of departments) in case when user is Principal
- After user clicks on Search button, the button is disabled and will be enabled only when user changes any dropdown values

a. Dropdowns :
No issues

2. Subject-wise average CO attainment graph

- After clicking Search button, average CO attainment graphs relevant to the selected academic year and terms are displayed

a. Graph :
No issues

Screen 2:

1. Left navigation pane

- The left pane is displayed after the user clicks on any one of the subjects clicked in the graph from screen 1.This component has 3 main sections:

a. The sort-by radio buttons :
Issues:
- In case any two subjects have the same subject name and same CO attainment score then changing the order of sorting(i.e. High-Low or Low-High) would not change the position of the active card because the algorithm which marks a card as active uses subject name or CO attainment for the decision.
- In RWD, the action that the radio buttons are disabled and greyed-out when one of the CO bar graphs is clicked has not been implemented.

b. The number of subjects select box and sort order radio buttons:
   Issues :
● In RWD, the action that the radio buttons are disabled and greyed-out when one of the CO bar graphs is clicked has not been implemented.
● The default option of the number of cards selected is 'none' in which all the cards are displayed is supposed to be removed as per design recommendations
● A maximum of 200 subjects are supported by the 'Number of entries' Selection box.

c. The cards displaying the subjects :
   No issues

2. CO-wise bloom's taxonomy graph
● On clicking any one of the columns of the graph of average CO attainment for courses, the selected course corresponding to that column has its CO wise Bloom's taxonomy graph displayed with CO's numbered from 1 to 5 with each CO having a group of three columns of direct, indirect and total attainment respectively

a. Graph :
   Issues :
● The graph displayed on small screens has two duplicated dropdowns for analyse containing graphs of CO1 and CO3 which must be in a single dropdown

3. CO-wise attainment data tables
● The tables have two sections : The left section contains the direct and indirect CO table and the right section contains the details of the methods used for evaluating those components

a. Direct CO attainment table
   No issues

b. Indirect CO attainment table
   No issues

c. Extra-curricular activities cards
   Issues:
- The selected placeholder text for the type of activity has font color:black instead of white.

d. Feedback details table
   Issues:
- The selected placeholder text for the type of activity has font color:black instead of white.
- The modal screen in small screen displays a table on clicking the visibility icon with no header row but works fine on large screens

e. Counselling details table
   Issues:
- The selected placeholder text for the type of activity has font color:black instead of white.
- The modal screen in small screen displays a table on clicking the visibility icon with no header row but works fine on large screens
